**866-840-6503**

## The easiest-to-use tools for the hardest-to-manage job.

TrackerCore Project Management helps you manage multiple projects, in one place, with ultimate project visibility.

### Bids

- ✓ Send bid requests quickly
- ✓ Reduce costs and go paperless
- ✓ Collaboration is key to successful jobs

### Proposals

- ✓ Save and re-use proposals
- ✓ Get eSignatures instantly (even on mobile devices)
- ✓ Create a catalog for faster proposals

### Customers

- ✓ Maintain customer data
- ✓ Access location information
- ✓ Create reports

### Work Orders

- ✓ Manage work orders
- ✓ Manage material & work items
- ✓ Create site sheet

### Scheduling

Many times we see customers scheduling with a whiteboard. This works so well visually that people overlook the hassle of erasing and rewriting constantly. We give you a “virtual whiteboard” showing the calendar and if you want to reschedule a job, just drag it to the day you want.

### Reports

Reports are the key performance indicators that allow everyone, from worker bee all the way up to ownership to visualize the efficiency and profitability of the company. Reports equate to knowledge and knowledge is power. Some reports include:

- ✓ Labor efficiency
- ✓ Jobs
- ✓ Overdue & Workload by installer
- ✓ Customer reports
- ✓ New
- ✓ Completed etc

### Mapping

Mapping your job locations allow you to visualize where your jobs are coming from. Combining the job location with vehicle location allows a new level of visualization for your business.

### Vehicle Tracking

Your vehicles are expensive and the potential liability you incur is substantial. We provide a number of ways to track the location of vehicles, in realtime and see data metrics such as speed, distance traveled and other pertinent data.

### Accounting

Invoicing can be automatic. Literally never enter an invoice again. Update customers, vendors and inventory without lifting a finger. Linking invoicing is one of the most impactful automation additions we provide.

We can integrate most popular accounting programs.

- ✓ QuickBooks/Intuit
- ✓ Sage
- ✓ Others

Wave Accounting is a free accounting program which can be added at no additional charge.

### How it Works

**Customers:** We help you get more customers by providing integration to marketing platforms, data analysis and even people to help in your Customer Service.

**The Work:** We provide you unprecedented tracking of field crews, maintenance, warranty and vehicles.

**The Billing and Maintenance:** We automatically provide you the option to integrate directly to many popular accounting programs (QuickBooks, Sage and others).
